OPERATION & MAINTENANCE

Towels are self-feeding until supply is depleted. Towels are refilled from the bottom via two push-up flaps by opening the door with the key provided and placing a full stack of folded towels on top of the partial load already in place. Here's an important feeding hint: make sure the leading edge of multi-fold towel is interleaved with trailing edge of existing stack. Alternatively, make sure C-fold towel is loaded with the flaps facing down.
